

# BUILDING SAFETY CERTIFICATE

## TOWHOMSOEVER IT MAY CONCERN

On appraisal, evaluation and assessment of the DAV MUKHYAMANTRI PUBLIC SCHOOL for the purpose of issue of Building Safety Certificate, I, **Mr. Rupesh Kumar**, hereby certify that the DAV MUKHYAMANTRI PUBLIC SCHOOL KANSABEL (C.G.) complies & follows the safety norms as per the required standards. The assessed key safety measures are:

**Structural Safety:** The school building has well-designed classrooms, laboratories, staff rooms, corridors toilets with excellent ventilation, electrical fittings, roofing and movement spaces. The construction of the building is a permanent structure and is done with the quality construction materials/designs that are strong enough to run the school.

**Fire Safety:** The school is very safe from fire hazards and possesses the fire fighting systems very much in place to meet any emergency. The fire-extinguishers are found fixed at suitable places.

**Safety in the Playground:** The complete green patch school Playground is very safe for the students to play games and they are being well-maintained and there are no hazardous materials like rusted nails etc found on the ground that may physically hurt the students.

**Water Safety:** The drinking water is safe in the school and the source of the water is well protected. The local authorities test the water periodically and certify the same. The school ensures safe potable water always to the students, staff members and visitors. In the event of the fire, the school has very good management system to handle the initial situations, if any.

**Laboratory Safety:** The laboratories in the school are positioned as per the prescribed standards and there is space for free mobility for students in case of an emergency. The chemicals and instruments are kept safely beyond the access of others. Each lab has a first aid box and facilities to exhaust the gases.
