

For safety is not a gadget but a state of mind

-Eleanor Everet

Keeping this thought in mind, **The Disaster Management Club** of D.A.V. Public School, Dwarka organized a training programme on “First Aid” on 4th February 2014 for the students of classes VIII and IX. It was conducted by expert faculty of CATS Ambulance. The workshop aimed at empowering students to take an action in case of an emergency, providing care for the injured until medical aid arrives. The experts of CATS Ambulance and their entire team provided the students and the teachers with an overview of first aid basic principles and gave demonstrations, there by allowing students to gain lifeguard skills. It was a learning experience for the students when they learnt about the precious life saving skills. It is indeed rightly said, “The door to safety swings on the hinges of common sense.”
